# 書叢繪出喜「閱」比賽 --- 優異獎

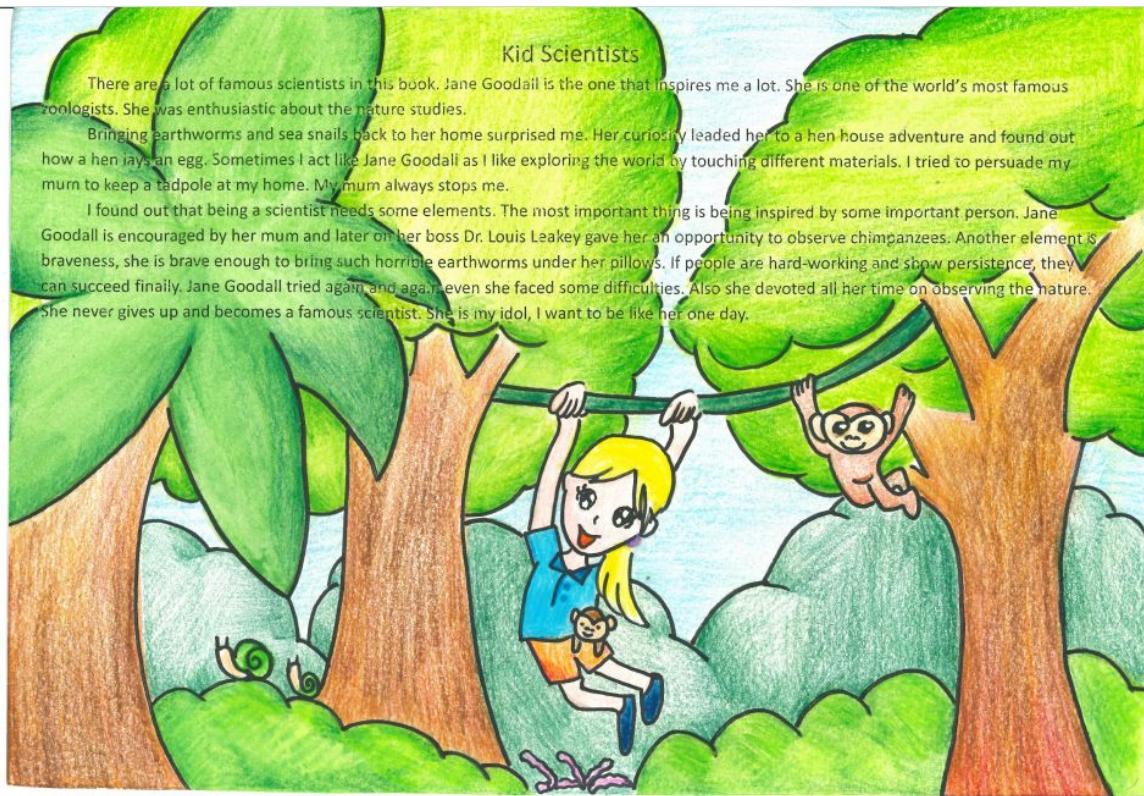

## 五仁 陳纖雲

### Kid Scientists

There are a lot of famous scientists in this book. Jane Goodall is the one that inspires me a lot. She is one of the world's most famous zoologists. She was enthusiastic about the nature studies.

Bringing earthworms and sea snails back to her home surprised me. Her curiosity led her to a hen house adventure and found out how a hen lays an egg. Sometimes I act like Jane Goodall as I like exploring the world by touching different materials. I tried to persuade my mum to keep a tadpole at my home. My mum always stops me.

I found out that being a scientist needs some elements. The most important thing is being inspired by some important person. Jane Goodall is encouraged by her mum and later on her boss Dr. Louis Leakey gave her an opportunity to observe chimpanzees. Another element is braveness, she is brave enough to bring such horrible earthworms under her pillows. If people are hard-working and show persistence, they can succeed finally. Jane Goodall tried again and again, even she faced some difficulties. Also she devoted all her time on observing the nature. She never gives up and becomes a famous scientist. She is my idol, I want to be like her one day.
